

Hikma expands licensing agreement with Rovi for their enoxaparin biosimilar

London, 24 April 2018 – Hikma Pharmaceuticals PLC (Hikma, Group) (LSE: HIK) (NASDAQ Dubai: HIK) (OTC: HKMPY) (rated Ba1 Moody's / BB+ S&P, both stable), the multinational pharmaceutical group, announces that it has signed a licensing agreement with Laboratorios Farmacéuticos Rovi SA (ROVI:SM) for their enoxaparin biosimilar.

Rovi's enoxaparin sodium is a biosimilar to Sanofi-Aventis' Lovenox® and Clexane®, which is an anticoagulant medication that belongs to low molecular weight heparin class. It is used to treat and prevent deep vein thrombosis and pulmonary embolism. As of March 2018, Rovi had achieved national authorisation for their biosimilar of enoxaparin in 16 European markets.

Under the terms of the agreement, Hikma has the exclusive rights to distribute and market enoxaparin across its MENA markets.¹

Mazen Darwazah, Vice Chairman and CEO of MENA and Emerging Markets said, "We are very pleased to be expanding our partnership with Rovi, adding this important cardiovascular product to our product portfolio in the MENA region. This partnership demonstrates the successful execution of our strategy to grow our biosimilar portfolio and improve patients' access to high-quality, affordable medicines."

Juan López-Belmonte Encina, Rovi Chief Executive Officer said, "Rovi is very excited to announce our recent agreement with Hikma, a global pharmaceutical company, with a strong presence across the MENA region. By leveraging Hikma's strong local presence, patients across the region will be able to access our enoxaparin biosimilar. In this new phase, together with Hikma, we aim to expand Rovi's global footprint and become a leader in the low-molecular-weight heparin field."

About Rovi

Rovi is a fully integrated Spanish specialty pharmaceutical company engaged in the research, development, in-licensing, manufacturing and marketing of small molecule and specialty biologic drugs. The Company has a diversified portfolio of products that it markets in Spain through its specialized sales force, calling on specialist physicians, hospitals and pharmacies. ROVI's portfolio of 30 principal marketed products is currently anchored by the internally-developed, second generation low molecular weight heparin, Bemiparin. Rovi's research and development pipeline is focused primarily on the expansion of applications, indications and alternative mechanisms of action for the heparin-derived products and other glycosaminoglycans and on the development of new controlled release mechanisms based on ISM[®] technology, with the aim of obtaining new pharmaceutical products that enable the regular administration of formulations which are administered daily in chronic and prolonged treatments. ROVI manufactures the active biological ingredient (Bemiparin) for its principal proprietary products and for injectable pharmaceutical products developed by its in-house research team, and utilizes its state-of-the-art filling and packaging capabilities to provide a broad array of toll manufacturing services to leading international pharmaceutical companies, primarily in the area of pre-filled syringes. In addition, ROVI provides contract manufacturing and packaging services of solid oral pharmaceutical dosage forms, using the most enhanced technology, Roller Compaction. Additional information about ROVI is available on the company's website: www.rovi.es
